COURSE DESCRIPTION

This course provides a rigorous introduction to the fundamental principles of international financial management. The goal is to provide a framework for making financial decisions in an international context. Topics to cover include: foreign exchange markets, parity conditions on foreign exchange rates, currency investments, currency risk management, derivative contracts on currencies, international capital markets, international portfolio diversification, and multinational capital budgeting.

COURSE OBJECTIVES

1. The international financial environment, where we study the core of the material on foreign exchange. Topics to be discussed include foreign exchange markets and international parity propositions
2. Currency risk management, where we study how the exchange rates volatility creates risks for corporations and how these risks can be managed
3. International portfolio investment and international corporate finance, where our focus is on multinational capital budgeting. Students will be exposed to a broad range of topics, including some of the latest developments in global financial markets.
