## 14. Course Policy

Learning happens only if we engage in the learning activities ourselves. Intended learning outcomes cannot be achieved if we simply copy the work of others. The act of copying the work of others is considered serious misconduct.

### Plagiarism and Misconduct

No plagiarism will be tolerated! The University Regulations on academic dishonesty will be strictly enforced!

Please check the University Statement on plagiarism on the web: <http://www.hku.hk/plagiarism/>.

Academic dishonesty is behavior in which a deliberately fraudulent misrepresentation is employed in an attempt to gain undeserved intellectual credit, either for oneself or for another. It includes, but is not necessarily limited to, the following types of cases:

Plagiarism - The representation of someone else's ideas as if they are one's own. Where the arguments, data, designs, etc., of someone else are being used in a paper, report, oral presentation, or similar academic project, this fact must be made explicitly clear by citing the appropriate references. The references must fully indicate the extent to which any parts of the project are not one's own work. Paraphrasing of someone else's ideas is still using someone else's ideas, and must be acknowledged. The representation of work as solely one's own when in fact it is the result of a joint effort.

Where a candidate for a degree or other award uses the work of another person or persons without due acknowledgment:

The relevant Board of Examiners may impose a penalty in relation to the seriousness of the offence; The relevant Board of Examiners may report the candidate to the Senate, where there is prima facie evidence of an intention to deceive and where sanctions beyond those in (1) might be invoked.
