4. Course Description

| Course Description | This course employs economic analysis to examine the interrelationships between three institutions: the state, law, and the economy. Topics covered include the nature and origin of the state, the differences between liberal and populist conceptions of the democratic state, and the dilemmas of political organization, conflict, and succession in autocratic states. The course also explores the rule of law, the relationship between political and economic order, and rent-seeking groups. Additionally, it delves into the distinctions between common law and civil law systems and the consequences of these differences. The course also investigates the modernization hypothesis, critical juncture theory, and the factors that contribute to the transition between dictatorships and democracies (and vice versa). Furthermore, it examines the role of economic, behavioral, and structural factors in these transitions, as well as the reasons why revolutions often come as surprises. The course also seeks to answer whether democracy promotes growth, the impact of inherited legal systems on growth, and the relationship between rulers, citizens, and interest groups in the pre-industrial world. Utilizing an analytic narratives approach, the course draws upon comparative case histories from various regions, including Europe, America, China, India, and the Middle |

<tr>
<td>A1. Written paper</td>
<td>The written paper should examine in depth ONE specific topic studied in the course. It should be a thoughtful examination of ONE specific topic based on the materials assigned in the reading list. There is NO need to consult additional reading materials. Students should NOT work on a subject from another course. Here are some good approaches: (1) review of one of the books assigned in this course. (2) between two books on a common subject. (3) on a topic that is discussed in several books or collection of papers. (4) for advice in deciding on a topic, she will also organize term paper sessions during normal lecture time for this purpose. The final written paper is due on Sunday, 17 December 2023. Late submissions will NOT be accepted. A precise word count must be given at the end of the paper. Footnotes and references should be placed at the end of the paper so that they can be excluded from the word count. Appendices are not necessary and not appropriate for papers of such a short length and should not be submitted. It is advisable to seek English language assistance if needed to ensure that your paper is clear. Students must submit a half-page proposal of the paper they intend to write. The deadline for the proposal is on Sunday, 15 October 2023. Late submissions will not be allowed. Students should include in the proposal student name, student number, the title of the project and a short summary of the subject they will investigate. Students are also encouraged to submit optionally a first draft of the final paper for the instructor to provide feedback, but this is optional, not mandatory. If students choose to submit a first draft, they must do so on Sunday, 12 November 2023. Your draft must be a complete one and with full citations (to avoid plagiarism). Otherwise, it will be returned without marking. Your grade on the paper will depend only on your final paper, and not your draft. However, plagiarism is not allowed for both</td>

Proposal and paper(s) must be submitted electronically via MOODLE. AI Policy for Coursework
This course permits the utilization of AI tools to assist in researching the proposal and the essay. Students are allowed to use AI for polishing and proofreading their written work. However, they must not rely on AI to compose or generate ideas on their behalf. As with humans, current AI systems can make errors. Therefore, students should exercise caution when using AI and assume responsibility for submitting any fictitious or false materials generated by AI, as if they had created those materials themselves. Plagiarism committed by AI will be treated as plagiarism by the student. In case of doubt, the instructor reserves the right to hold a one-to-one oral exam with the student for grade adjustment. When quoting text directly from AI, students should cite it as follows, according to the recommendations of TALIC, HKU:

Quotation in the Article:
Victorian society, laden with social inequality, is vividly exposed in "Oliver Twist" as Dickens "critically examines the underbelly of Victorian society and its harsh treatment of the poor, particularly orphans like Oliver, exposing the cruel reality of workhouses and criminal underworld." Assessment Rubrics

A1. Written paper

A+, A, A-
Identifies and addresses the main themes and issues clearly, including their subsidiary, embedded or implicit aspects. Consistent perceptive and critical engagement with the themes and issues based on comprehensive understanding of relevant concepts and theories, with effective analysis, synthesis and application of knowledge. Demonstrates a comprehensive command of existing arguments relevant to the topic, and examines the issues from all important perspectives including rival positions and counter-evidence. The arguments fit together logically and build a compelling case. The paper has a clear

Structure and organization, with an introduction that states the main themes and writer's position and a conclusion that summarizes the main arguments. Each paragraph has a central idea which is developed throughout the paragraph with supporting details. The paper has very few, if any, errors in grammar and vocabulary. Quoted materials from other sources (with proper citation) are used only to support and strengthen arguments instead of replacing the student's own writing.

**B+, B-, B**
- Identifies and addresses the main themes and issues, but not all subsidiary, embedded or implicit aspects.
- Generally perceptive and critical engagement with the themes and issues based on good understanding of relevant concepts and theories, as well as effective analysis, synthesis and application of knowledge.
- Demonstrates a good command of existing arguments relevant to the topic, and examines the issues with regard to some important perspectives including rival positions and counter-evidence.
- The arguments fit to form a clear own position, but some arguments are underdeveloped and some considerations overlooked.
- The paper has a clear structure and organization, with an introduction that states the main themes and the writer’s position and a conclusion that summarizes the main arguments.
- Some paragraphs lack a central idea or supporting details.
- The paper has some errors in grammar and vocabulary. Quoted materials from other sources (with proper citation) are used to support and strengthen arguments, but sometimes also used to replace the student’s own writing.

**C+, C-, C**
- Identifies and addresses the main themes and issues, but not the subsidiary, embedded or implicit aspects.
- Only occasional perceptive and critical engagement with the themes and issues reflecting mostly superficial understanding of relevant concepts and theories, with some inaccurate analysis, synthesis and application of knowledge.
- Demonstrates insufficient command of existing arguments relevant to the topic, and not all main arguments or counter-arguments examined.
- Offers own position but the reasoning is sometimes impaired by weak, emotive or inconsistent argumentation.
- The presentation has an introduction and conclusion, but these do not fully capture the essence of the topic and discussion.
- Some paragraphs lack a central idea or supporting details.
- There are distracting language errors though the overall meaning is still intelligible.
- Quoted materials from other sources (with proper citation) are used more to replace the student’s own writing than to support and strengthen arguments.

**D+, D**
- Identifies and addresses the main themes and issues only partially.
- Very limited critical engagement with the themes and issues rarely goes beyond reproduction of relevant concepts and theories, and with some inaccuracies even doing so.
- Demonstrates a lack of understanding of existing arguments relevant to the topic.
- Offers own position but the arguments are poorly made and not well supported.
- The topic is not properly introduced and the conclusion is very brief.
- Shows little ability to construct paragraphs with a central idea and supporting details.
- Frequent errors in simple grammar and vocabulary. Errors are distracting and the overall meaning is not easily intelligible.
- Quoted materials from other sources (with proper citation) are heavily used to replace the student’s own writing.

**F**
- Failure to identify and address any main theme and issue.
- No critical engagement with any issue, little mentioning and application of relevant concepts and theories, and with inaccuracies when doing so.
- Demonstrates a lack of understanding of existing arguments relevant to the topic.
- No coherent own position and the arguments are confused and flawed.
- Introduction and conclusion are unclear, lack details or missing altogether.
- Shows little ability to organize the paper into paragraphs that have a central idea and supporting details.
- Language errors are so frequent and distracting that the paper is largely incomprehensible.
- Quoted materials from other sources are heavily used to replace the student’s own writing, sometimes without proper citation.

**A2. Final Exam**

**A+, A, A-**
- Demonstrates superior grasp of all aspects of the course (basic concepts and major perspectives and arguments in the literature).
- Demonstrates excellent ability to interrelate and synthesize course materials, and to arrive at one’s own position in controversial issues based on knowledge acquired from the course.

**B+, B-, B**
- Demonstrates good grasp of all major aspects of the course (basic concepts and major perspectives and arguments in the literature).

14. Course Policy

1. The University Regulations on academic dishonesty will be strictly enforced! Please check the University Statement on plagiarism on the web: http://www.hku.hk/plagiarism/

2. Academic dishonesty is behavior in which a deliberately fraudulent misrepresentation is employed in an attempt to gain undeserved intellectual credit, either for oneself or for another. It includes, but is not necessarily limited to, the following type of case:

   a. Plagiarism – The representation of someone else’s ideas as if they are one’s own. Where the arguments, data, designs, etc., of someone else are being used in a paper, report, oral presentation, or similar academic project, this fact must be made explicitly clear by citing the appropriate references. The references must fully indicate the extent to which any parts of the project are not one’s own work. Paraphrasing of someone else’s ideas is still using someone else’s ideas, and must be acknowledged.

   b. Unauthorized Collaboration on Out-of-Class Projects - The representation of work as solely one’s own when in fact it is the result of a joint effort. Where a candidate for a degree or other award uses the work of another person or persons without due acknowledgement:

       • The relevant Board of Examiners may impose a penalty in relation to the seriousness of the offence;

       • The relevant Board of Examiners may report the candidate to the Senate, where there is prima facie evidence of an intention to deceive and where sanctions beyond those in (1) might be invoked.

   c. Double Submission of Assignments - The submission of assignments as fulfillment of work in this course using materials that were or are being submitted for another course is also plagiarism. It is self-plagiarism and is the same as plagiarism, i.e., representation of someone else’s ideas as our own. That some else is oneself. It is an attempt to get credit for work that will earn credit elsewhere.
