4. Course Description

Course Description

This course applies core theoretical knowledge in economics and/or finance acquired throughout the undergraduate curriculum to research a real issue. The student may select and match core theoretical concepts with significant applications in the world, which could be of local, regional and global relevance, both contemporary and historical. The selection will include an application of these concepts to either the making of public policy or the strategic management of the firm. The choice of research topic should be selected to help students consolidate and integrate the concepts and tools learned in economics and/or finance through an analysis of the nature of the problem, its causes and consequences, the choice of feasible solutions, their tradeoffs, and also normative and political economy considerations.

Each student will conduct faculty directed policy analysis in form of collaborative group or individual projects. The exact area of policy analysis may vary, depending on the general interests of class AND instructors in charge of the class.

6. Faculty Learning Goals
Goal 1: Acquisition and internalization of knowledge of the programme discipline
Goal 2: Application and integration of knowledge
Goal 3: Inculcating professionalism
Goal 4: Developing global outlook
Goal 5: Mastering communication skills
Goal 6: Cultivating leadership

14. Course Policy

Attendance:

Class attendance is compulsory. Except under very special circumstances approved by the instructor, students who have less than 80% of attendance will receive a failure grade.

Deadlines:

All graded materials should be taken or submitted at the stated time unless you have a valid university excuse (death in immediate family, illness requiring you to seek a doctor's care, etc). Unless circumstances preclude it, advance notice is requested. Assignments turned in after the deadline may be accepted with a reduced grade. My sympathy goes out to those who fall victim to a computer crash. However, no extension of time is granted for computer glitches. While you cannot anticipate a crash, you can reduce its serious consequences by making frequent back-up copies as you work, and by not waiting until the last minute to get assignments done.

Academic Conduct:

The University Regulations on academic dishonesty will be strictly enforced! Please check the University Statement on plagiarism on the web (<http://www.hku.hk/plagiarism/>). Academic dishonesty is behavior in which a deliberately fraudulent misrepresentation is employed in an attempt to gain undeserved intellectual credit, either for oneself or for another. It includes, but is not necessarily limited to, the following types of cases:

(i) Plagiarism: The representation of someone else's ideas as if they are one's own. Where the arguments, data, designs, etc., of someone else are being used in a paper, report, oral presentation, or similar academic project, this fact must be made explicitly clear by citing the appropriate references. The references must fully indicate the extent to which any parts of the project are not one's own work. Paraphrasing of someone else's ideas is still using someone else's ideas, and must be acknowledged.

(ii) Unauthorized Collaboration on Out-of-Class Projects: The representation of work as solely one's own when in fact it is the result of a joint effort.

(iii) Cheating on In-Class Exams: The covert gathering of information from other students, the use of unauthorized notes, unauthorized aids, etc.

(iv) Unauthorized Advance Access to an Exam: The representation of materials prepared at leisure, as a result of unauthorized advance access (however obtained), as if it were prepared under the rigors of the exam setting. This misrepresentation is dishonest in itself even if there are not compounding factors, such as unauthorized uses of books or notes.

Where a candidate for a degree or other award uses the work of another person or persons without due acknowledgement:

(i) The relevant Board of Examiners may impose a penalty in relation to the seriousness of the offence;

(ii) The relevant Board of Examiners may report the candidate to the Senate, where there is prima facie evidence of an intention to deceive and where sanctions beyond those in (i) might be invoked.
